

# SURVEILLANCE UPDATE

## Prescription Drug Abuse: 2005 N.C. Youth Risk Behavior Survey (YRBS)

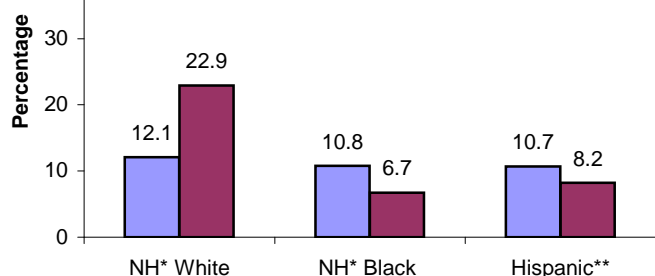

Percentage of N.C. middle and high school students who have taken a prescription drug such as OxyContin, Percocet or Demerol without a doctor's prescription, by gender:  
N.C. YRBS 2005

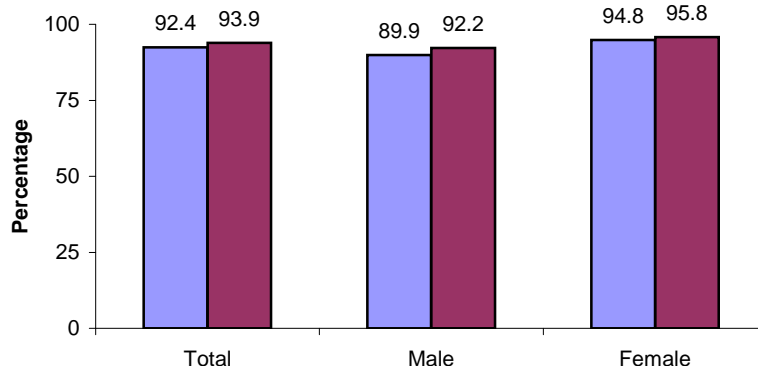

Percentage of N.C. middle and high school students who have taken a prescription drug such as OxyContin, Percocet or Demerol without a doctor's prescription, by grade level: N.C. YRBS 2005

Percentage of N.C. middle and high school students who have taken a prescription drug such as OxyContin, Percocet or Demerol without a doctor's prescription, by race/ethnicity:  
N.C. YRBS 2005

Percentage of N.C. middle and high school students who received grades of A's, B's & C's, by gender:  
N.C. YRBS 2005

Weighted to provide estimates representative of the public middle school and high school student population; students who reported having taken a prescription drug such as OxyContin, Percocet, Demerol or Zanax without a doctor's prescription one or more times during their life. Specific data on 95 percent confidence intervals and regional definitions is at the N.C. YRBS website: [www.nchealthyschools.org/data/yrbs](http://www.nchealthyschools.org/data/yrbs).

\*NH = Non-Hispanic. \*\*Caution when interpreting. Results based on small sample size.

The N.C. Youth Risk Behavior Survey (N.C. YRBS) provides a critical source of public health data for understanding the scope of injury-related problems and measuring progress toward overall goals among public school students. N.C. YRBS is a comprehensive statewide sample of 3,200 middle and 3,400 high school students from across the state. Every other spring in odd years, a core set of injury-related questions are asked along with other health and risk-factor questions. Risk-factor variables include information such as academic achievement, seat belt use and physical assault. The sampling scheme is intended to generate a statewide representative sample of weighted data. Increasing school district participation and data utilization are two keys for future success. See the N.C. Healthy Schools website for more information: [www.nchealthyschools.org](http://www.nchealthyschools.org).
